ATTACHMENT 3
Downloading STAT-PA software and user manual from the EDS-EPIX bulletin board

1. If this is the first time you will be installing Specialized Transmission Approval Technology - Prior Authorization (STAT-PA) software on your computer, we recommend that you create a directory on your hard drive specifically for your STAT-PA software. To do this, type the following command at the C:\ prompt in DOS:

    MD STAT PA   [ENTER]

2. Set up your communications software to dial EDS-EPIX at (608) 221-8824. Along with the telephone number, you may need to program your software to dial with the following settings:

Baud Rate:	14,400 (maximum)	Duplex:	Full
Parity:	None	Protocol:	ZMODEM (recommended)
Data Bits:	8	Terminal Emulation:	ANSI
Stop Bits:	1		

    Note: These settings are standard for most communication software packages.

3. Dial into EDS-EPIX. Before your initial login, you will be asked if you have a color screen. Select Y/N/Disable, whichever is appropriate for your system.

4. Next, you will be asked your name. You may enter your name and register as a new user, or you may login as a guest user as follows:

    Enter your name, or type NEW or GUEST

5. Press [ENTER] to continue through EDS-EPIX news and review new user help information until you reach the Main Menu.

6. At the EDS-EPIX Main Menu, choose "Files – Download/Upload Files" by typing "F" to continue to the EDS-EPIX Files System Menu.

7. Next, select "6-Files-STAT-PA software" by typing "6" [ENTER]. Press [ENTER] again when prompted to list filenames available for downloading. Select "N" when asked to display long file descriptions.

8. To tag a file for downloading, select "Tag," [ENTER]. At the next screen, type the letter indicated under the TAG column that corresponds to the file you want to receive. When done, press [ENTER]. You will be returned to the Files System Menu.

    Use the following guidelines to decide which files you need to download:
    A．STATEXTD.EXE – If you have already installed STAT-PA on your computer but are getting memory-related error messages, you may need this file.

B. STATSOFT.EXE – If you have never installed STAT-PA on your computer, you will need this file.

C. STATUPDT.EXE – If you have already installed STAT-PA computer but you need the latest version of the software, you will need this file.

9. At this point, you may select "Xproto-Change Xfer Protocol" to choose your download protocol if you haven't done so already. We recommend that you select "Zmodem" as your protocol.

10. Choose "Download – Receive Files from BBS (Bulletin Board System)" by typing "D" [ENTER]. When asked if you wish to select the tagged files(s), choose "Y." You will be asked if you want to automatically disconnect after your download. Choose "Yes," "No," or "Quit" accordingly. The bulletin board is now ready to send the file. Next, you will need to tell your PC to receive a file. If you are unsure of how to do this, please refer to the user manual that came with your communication software package.

11. When you have downloaded your file(s) and disconnected from EDS-EPIX (either by automatically disconnecting or choosing "G – Good-bye" from the Menu), quit your communication software. Exit to your DOS prompt.

12. Go to the subdirectory you specified as your download path to find the downloaded file. If you did not specify a subdirectory, the file will go to your communications software default directory (most likely your C drive).

13. Follow the appropriate step(s) indicated below to install the downloaded file(s):

    STATEXTD.EXE
    - Copy the STATEXTD.EXE file to your STAT-PA directory.
    - At the DOS command prompt, type the name of the file without the ".EXE" extension:
           STATEXTD   [ENTER]

    STATSOFT.EXE
    - Copy the STATSOFT.EXE file to your STAT-PA directory.
    - At the DOS command prompt, type the name of the file without the ".EXE" extension:
           STATSOFT   [ENTER]

    STATUPDT.EXE
    - In your STAT-PA directory, rename the current STATPA1.EXE file by typing:
           RENAME STAT PA1.EXE STATBACK.EXE   [ENTER]

    - Copy the STATUPDT.EXE file to your STAT-PA directory.
    - At the DOS command prompt, type the name of the file without the ".EXE" extension:
           STATUPDT   [ENTER]

14. The files with the .DOC extension are your manuals. These files are ASCII DOS text files. To print these files, use the DOS Print command: PRINT [filename]. The file will be printed on the print device you specify.

15. If you have any questions about the EDS-EPIX bulletin board, please contact the Electronic Media Claims unit at (608) 221-4746, Ext. 3037 or 3041.
